Senior full-stack engineer with 10+ years in web and mobile. Built Namefi's AI buyer-research workflow, cutting days of manual work to about five minutes per domain. Built Memorang's CMS and media recommender.

Based in Mumbai • Available for India/APAC travel

Experience

Namefi Early-stage

ICANN-accredited registrar building AI products for domain ownership and sales.

Senior Full Stack Engineer Hands-on Mumbai / Remote • Jan 2025 - Present

- Built Namefi Outbound, cutting buyer research from days to about five minutes per domain: company research, buyer qualification, contact discovery, and outreach drafts. Informed by interviews with 40-50 domain sellers.
- Led migration to a new monorepo; established developer tooling, a Next.js app with server-side rendering and static generation, and a Hono backend. Built UI and initial Privy and wallet authentication.
- Integrated AI SDK tool calling with Exa; built an internal analytics agent with custom tools for Google Analytics, Twitter Analytics, and PostHog.
- Built Namefi Studio's multi-step logo and video generation workflows with Temporal, separating strategy from generation and reviewing outputs for domain-name accuracy.
- Built domain registration, checkout, payment integrations, and listing ingestion; migrated Airflow orchestration to Temporal. Currently building AI usage metering.

Memorang Growth-stage

AI-assisted educational content platform for structured curricula and assessments.

Lead Full Stack Engineer Hands-on Leadership Mumbai / Remote • Apr 2024 - Jan 2025

- Built EdWrite's CMS services and UI, including a TanStack Table data grid and shared component library developed with designers.
- Shipped a media recommender using embeddings and pgvector similarity search, with LangChain self-querying to generate metadata filters from natural-language queries.
- Led two CMS engineers; planned scope and architecture with the CTO and weekly priorities with the CEO. Defined TOEFL content schemas with ETS subject-matter experts.
- Built AI-assisted question, audio, and image generation with subject-matter-expert review and publishing approval; led a Flow-to-TypeScript migration using codemods and AI-assisted refactoring.

Product engineering engagements

Client work through Yuppies Tech.

Self-employed Hands-on Leadership Mumbai / Remote • Jan 2021 - Apr 2024

Hands-on full-stack and mobile engineering with client product teams, working directly with CTOs and engineering leads. Selected engagements:

Veera Browser: led a Chromium-based Android browser through Play Store launch, maintaining C++ and Java patches, upstream updates, and release tooling. Later established the iOS platform and release setup.

Texts: shipped the Facebook Messenger integration in TypeScript and Electron; reverse-engineered Messenger's undocumented interfaces and implemented MQTT transport, typed Thrift codecs, message synchronization, and media handling.

ZebPay: modernized iOS and Android apps and release pipelines; shipped exchange and payment features, wallet integrations, and country-specific KYC.

Mitsubishi Motors: built MiAR's native iOS and iPadOS apps and React WebAR experience, optimizing 3D vehicle assets for mobile devices and building photo-contest tooling.

Airbus Tripset: built the React Native app and backend integrating Airbus and Amadeus APIs, travel guidance, itineraries, and notifications, with Milkinside as design partner.

Kult 0 → 1

Consumer beauty and skincare commerce.

Head of Mobile Engineering Hands-on Leadership

Mumbai · Jan 2020 - Jan 2021

- Led 10 mobile engineers building native Android and iOS apps in Kotlin and Swift, working with product and interaction designers.
- Designed backend-driven UI architecture for dynamic layouts and rich animations; built and optimized product-listing and product-detail screens.
- Defined API contracts with backend engineers and established mobile CI/CD, analytics, deep linking, and error monitoring.

Yilu 0 → 1

Smart travel platform built for Lufthansa Group with BCG Digital Ventures.

Founding Engineer Hands-on Leadership

Berlin · Nov 2018 - Dec 2019

- Designed the native mobile architecture and release automation, built Terraform-managed AWS infrastructure, and shipped iOS and Android features for Eurowings.
- Joined as the first engineering hire; led a five-developer full-stack team and partnered with the CTO on hiring.

8fit Growth-stage

Fitness and nutrition platform later acquired by Withings.

Senior Technical Architect Hands-on

Berlin · Nov 2017 - Oct 2018

- Architected a hybrid Apple TV fitness app.
- Built cross-platform mobile features across JavaScript, Swift, Objective-C, Java, and Kotlin.

Housing Late-stage

Indian real estate search and transaction platform.

Team Lead Hands-on

Mumbai · Oct 2016 - Oct 2017

- Led Housing's React Native app architecture, sharing JavaScript across iOS and Android.
- Designed its state management, reactive data flows, offline persistence, and component-driven UI. Also built automated testing and release systems covering diagnostics, signed builds, beta distribution, and over-the-air updates.
- Contributed to Housing.com's Progressive Web App for users on slow and inconsistent network connections.

Earlier Consulting and Startup Work

Bridg, 1mg, HornOk, Volkno, Meriad, and self-employed work.

Software Engineer and Consultant Hands-on

Los Angeles / India · 2015 - 2016

- Built web and mobile products for email and customer-data tools, real-time medical consultations, and connected fleet management using JavaScript, Java, and Ruby on Rails.
- Mentored 1mg's mobile team on hybrid app architecture and modern development tooling.

Education

University of California, Los Angeles

Bachelor of Science.

Computer Science and Engineering

Los Angeles, CA · 2013 - 2016

Delhi Public School, R. K. Puram

High School.

Computer Science, Physics, Chemistry, Math

New Delhi, India · 2011 - 2013
